AutoCAD Crack + Free Download X64

AutoCAD Crack Mac is used for creating mechanical engineering, architectural, and civil engineering drawings, architectural modeling, landscape architecture, surveying, and building construction drawings, and computer-aided design of mechanical and electrical equipment. Among other uses, AutoCAD may be used for production work, technical drawing, house design, layout of electrical and plumbing systems, technical documentation, furniture design, and installation design. AutoCAD is also used for business and consumer mapping and GPS navigation, technical illustration, architecture, animation, real estate and land planning, and consumer design (e.g., bathroom remodeling, home design, lighting design, kitchen remodeling, site planning, product design, etc.). Currently, a licensed AutoCAD user may use AutoCAD on a Windows, OS X, Linux, or UNIX system. A user may also use AutoCAD on a mobile device, such as a mobile or cellular phone or tablet computer. AutoCAD may be used to create a variety of files that may be used by AutoCAD and by other computer-based applications. These files may be a combination of text and graphics (as in the case of a text document or spreadsheet). AutoCAD is often used for aerospace and mechanical design, as well as drafting, visualization, and prototyping of mechanical and electrical systems and structural components. Autodesk 3D Studio is a family of applications, providing 3D modeling and rendering tools. Autodesk 3D Studio is used for creation and editing of 3D models, animations, and simulations. Autodesk 3D Studio models may be viewed on computers running Windows, OS X, or Linux, or may be viewed on mobile devices. AutoCAD LT is an abbreviation for AutoCAD Learning Tools, and is an educational application. It is a set of tools for use in a classroom. AutoCAD LT is an educational product, not intended for production use. AutoCAD is compatible with many other computer applications for use as a CAD engine. These include the following applications, among others: ePlant is a 3D modeling and visualization tool used for creation of 3D geometry and rendering. It is used for architecture, industrial

design, landscape architecture, and interior design. AutoCAD LT and ePlant work together to offer a 3D platform. AutoCAD and ePlant are a part of Autodesk Family 15, a series of

57.1.1 Architecture Directives An architecture directive is a user-defined named entity. It is created from user interface commands to the "Architecture > Modeling > Architecture Directives" module. A directive is a container that contains a number of drawing elements (Figure 57.1). The drawing elements included in a directive are listed on the "Architecture > Modeling > Architecture Directives" module. You can use these drawing elements in any other drawing that uses this directive. **Figure 57.1** Sample architecture directives. To open an architecture directive in your drawing: 1. Choose Application Button ⇒ Architectural Tools ⇒ Architectural Directive. The Architectural Directive dialog box opens (see Figure 57.2). 2. Select a drawing for the new command. 3. Click OK. The drawing is now replaced with the new architecture directive. **Figure 57.2** Architecture Directive dialog box * * * ## How Do I Make Changes to an Architecture Directive? You can make changes to any of the drawing elements in an architecture directive by using the Architectural Directive Edit button (see Figure 57.3). **Figure 57.3** Architecture Directive Edit button There are four types of architecture directives. • **Directives:** Include drawing elements, such as walls, rooms, and openings, all drawn within a single drawing. A single structure is the result of a single directive. There are also non-drawing elements, such as text, that are applicable to a single directive. These include the name, description, and annotations of the building and other information that is related to the directive. • **Drawing Elements:** Include only a single drawing element, such as a wall, room, or opening. • **Boundary Objects:** Include boundary objects, such as doors, windows 5b5f913d15
