The network connectivity of the iPod 3G may cause problems with some media .Q: Reading entire text file into list I am trying to read an entire text file into a list of dicts in Python. Unfortunately, I am running into an error. # The Data Source file_name = 'data_input.txt' # Does the file exists? if os.path.exists(file_name): # Open the file with open(file_name, 'r') as file_in: # Scan the file for line in file_in: # Extract the header and the item header, item = line.split('\t') # If the header value is a list if isinstance(header, list): # Create a new dict in the list list[header].append(item) # Finally, print the dicts to show that they were modified print list # Close the file file_in.close() The error I am running into is: TypeError: 'list' object does not support item assignment I have been scratching my head on this one for a while and cannot figure out what it is that I am doing wrong. A: You use list itself, and by doing that you are assigning values to list. You need to assign specific items in list - this can be done using list.append function. list[header].append(item) Q: Application won't save its data when I launch

Hack: Xbox Controller iPod Shuffle

Hack: Xbox Controller iPod Shuffle
